DESTINY RINGS

Fact Sheet

Destiny is ringing. Connect in real life.

ABOUT

Destiny Rings is a proximity-based social platform that helps people meet naturally in real life. A companion iOS app and a wearable work together so compatible people nearby can connect, without endless swiping. It supports Dating, Social and Networking modes.

HOW IT WORKS

1. Set your intent in the app: dating, social or networking.
2. Your wearable buzzes when someone compatible is nearby.
3. Say hi. Connecting is always mutual.
